About Me

Final-year Computing student (Software Development) at the University of Sydney with hands-on experience designing, building, and shipping production software end-to-end. Works across the stack from React, Next.js, and Astro front-ends to database schema design and cloud deployment, with a foundation in Python, Java, and SQL. Has delivered multiple live sites for paying clients and built the full front-end of an industry advertising-analytics platform, bringing a strong design sensibility to every build. Seeking a web developer role.

Experience

Freelance Web Developer

Jan 2024 – Present

Self-employed, Sydney, NSW

- Designed, built, and deployed responsive websites for small-business clients end-to-end; from requirements gathering and branding through development, deployment, domain configuration, and email setup.
- **Flourish OT Services** (occupational therapy): Built the complete brand identity from scratch (branding guidelines, logo, colour scheme, typography, flyers, report templates, letterhead, email signatures, and UI styles) prototyped the site in Figma, and developed the entire responsive website with a working enquiry flow, delivered end-to-end in six weeks.
Tools: TypeScript, Astro, Tailwind CSS, Figma, Resend, Cloudflare
- **Lily's Study Buddies** (tutoring): Defined objectives with the client and built a fully responsive marketing site aligned to their branding, using a reusable component system for fast, maintainable updates.
Tools: TypeScript, Astro, Tailwind CSS, Figma
- **Speech Base** (speech pathology): Created the full brand identity and collateral (logo, colour scheme, typography, flyers, report templates, letterhead, email signatures, and UI styles) and delivered the complete responsive website within a one-week deadline, plus ongoing technical support.
Tools: TypeScript, Astro, Tailwind CSS, Figma
- **Portfolio** (personal project): Designed and built a playful, animation-rich personal site. It includes an intro animation, draggable interactive objects (a pencil that draws on the page, plus a crochet hook and yarn), and projects presented as openable books. *Tools: React, Next.js, Astro, Tailwind CSS*

Capstone Project - Winboard AI Advertising Platform

2024

Industry Capstone, University of Sydney

- Served as primary client liaison across a 12-week build, running 10+ stakeholder meetings and delivering 5 presentations and 3 videos under tight deadlines.
- Designed and prototyped the full product UI in Figma, including a responsive navigation system, login flow, and advertiser dashboard.
- Led front-end planning with a reusable component library and contributed to database schema design, improving development efficiency across the team.
- Tools Used: TypeScript, Next.js, TailwindCSS, Figma

Education

University of Sydney, Bachelor of Computing

Feb 2022 – Present

- Software Development Major

Technologies

Languages: Python, Java, JavaScript, SQL
